1255 E University Dr, Tempe, Arizona, 85288 | skalaska@asu.edu | (602) 399-6425

EDUCATION

Arizona State University | Master of Science in Information Technology | GPA: 4.00/4.00 **August 2024 - May 2026**
University of Mumbai | Bachelor of Engineering in Computer Engineering | GPA: 3.41/4.00 **August 2018 - May 2022**

SKILLS

Programming Languages: Java, C#, Python, TypeScript, JavaScript, SQL
Frameworks & Libraries: Spring Boot, ASP.NET Core, NestJS, Angular, ReactJS, D3.js, Flask, OpenCV, Pytorch, Pandas
Cloud & Data Technologies: AWS, Azure, DynamoDB, RDS(PostgreSQL), MS SQL Server, Snowflake, ElastiCache (Redis)
DevOps & Tools: Docker, Amazon EKS, SQS, SNS, Kinesis, CloudWatch, Kafka, Terraform, CI/CD, Postman, Git, Jenkins

PROFESSIONAL EXPERIENCE

Software Engineer Intern | Rocket Mortgage | Detroit, MI **May 2025 - Dec 2025**

- Built a full-stack Mortgage Fee Setup feature with **Angular 17** and RxJS frontend, REST APIs across **ASP.NET Core** and NestJS microservices backend, and three-tier service token security architecture ensuring financial compliance at scale.
- Led **Amazon ECS** to **Amazon EKS** migration on **AWS Fargate**, restructured **GitHub Actions** CI/CD pipelines with blue-green deployments and **Terraform** IaC, cutting release downtime by 40% across production mortgage workflows.
- Refactored legacy subsystems eliminating 1,500+ lines across multiple codebases, optimized **Redis** caching improving API response times by 23% for Rocket Pro platform handling billions of mortgage transactions via event-driven **microservices**.
- Drove unit and **integration testing** modernization from Cypress to Playwright using Page Object Model, validated REST endpoints via Insomnia across Loan, Application, and Pricing APIs, achieving 95% platform coverage.
- Monitored Splunk logs, **AWS CloudWatch**, and Lambda executions, integrated **Auth0 SSO** for secure access control.

Software Engineer II | Accenture | Mumbai, India **October 2022 - July 2024**

- Developed enterprise-wide Questionnaire Management Tool (QMT) using Angular, **ASP.NET Core** with CRUD operations and **RESTful APIs** integrating Workday and DataFabric for employee skills data management.
- Developed interactive dashboards, charts and client-facing kiosks using **D3.js** for Accenture Offices (Talent Showcase), built **Generative AI** cards for (Dipa) chatbot in MS Teams, reducing support response time by 40% for 5,000+ employees.
- Optimized **MS SQL Server** database managing skills data for 10000+ employees across Asia Pacific Accenture Offices.
- Architected enterprise-scale infrastructure using **Azure DevOps**, implemented CI/CD pipelines, resolved critical vulnerabilities through API testing with Postman for QMT and Talent Showcase applications.
- Promoted to Software Engineer II for high-impact Agile sprint executions, cost reduction and improving team productivity.

PROJECTS

RealStream - Short Video Streaming Platform | RealStream.git | realstream.site **February 2026**

- Architected a full-stack short video platform using polyglot microservices - Java **Spring Boot** and a Python FastAPI scraper services, containerized via **Docker** and deployed at a custom domain via Cloudflare Tunnel.
- Secured application with **Google OAuth2** authentication and stateless JWT-based session management using Spring Security, configuring CORS policies for cross-origin Next.js frontend access, SSO login flow with role-based access control.
- Developed Python FastAPI scraper integrating YouTube Data API v3 for topic and channel-based video ingestion, persisting to **PostgreSQL** for user, likes, and comments data and **MongoDB** for hashtag-indexed video metadata.
- Built TikTok-style video feed with Next.js 16, **React 19**, Tailwind CSS scroll-snap infinite scrolling, and Glassmorphic UI.

RocketMind - AI Repository Analysis Tool | Rocket Mortgage Hackathon **June 2025**

- Built AI-powered code analysis platform integrating **AWS Bedrock LLM** through custom MCP server, enabling repository scanning with intelligent chunking for context-aware insights and code quality reviews.
- Developed Angular frontend with intuitive tab interface for displaying onboarding documentation, architecture diagrams, and automated code recommendations, **Python FastAPI** backend with efficient chunking for large codebase processing.
- Secured 550+ private GitHub repositories using Auth0 SSO authentication integrated with **AWS IAM**, creating role-based access control for company-certified users, only intern-led team to reach hackathon finals, presenting to senior leadership.

SpyPro - Precision Location Tracking in 3D Space | SpyPro.git | spypro-lc88.onrender.com **March 2025**

- Developed a real-time 3D tracking system with floor-level accuracy using Vite, Mapbox GL JS 3D API, and **Socket.IO** for bidirectional **WebSocket** communication with GPS altitude-based positioning and live geospatial telemetry streaming.
- Engineered **Node.js**/Express backend with Mapbox Tilequery API for dynamic ground elevation lookups and an LRU-cached floor estimation algorithm, subtracting terrain elevation from GPS altitude for precise floor-level tracking.
- Built 3D map visualization with **Glassmorphic UI**, dynamic floor markers, and extruded buildings using Mapbox GL JS.

PUBLICATIONS & VIRTUAL INTERNSHIP

Published research papers: "Facial Recognition Based Emotion Analysis" at JETIR, October 2021, "Predicting Success of Crowdfunding Campaigns Using Machine Learning" at ICEAT-2022" | J.P. Morgan - Software Engineering Virtual Experience
